

## A Revised Checklist and Bibliography of the Platyhelminth Parasites Reported by Dr. Yoshimasa Ozaki, 1923-1966, and Their Specimens Deposited in the Meguro Parasitological Museum, Tokyo

Takeshi SHIMAZU\*

**Abstract:** Parasite collection of Dr. Yoshimasa Ozaki has been deposited in the Meguro Parasitological Museum (MPM), Tokyo. Information on the platyhelminth parasites (turbellarians, monogeneans, and digeneans) reported in Dr. Ozaki's publications from 1923 to 1966 is assembled in a host-parasite list. The list includes: (1) for each parasite species, data adopted from corresponding publication(s), namely, the year(s) of publication(s), page number(s), figure number(s), table number(s), location(s) within the host(s), developmental stage(s), main field(s) of study, and locality(ies); (2) the holotype depository, if known; and (3) the MPM Collection Number(s) of the specimen(s) found in the collection. No note is given on taxonomy and nomenclature of host and parasite species. A bibliography, parasite-host index, and Japanese host name index are presented.

**Key words:** checklist, bibliography, platyhelminth parasites, parasite collection, Dr. Y. Ozaki.

### Introduction

Dr. Yoshimasa Ozaki (1891-1976) did outstanding taxonomic research on parasitic platyhelminths, chiefly digeneans, from Japanese animals. He published many papers on these parasites as sole author or with his colleagues. His collection of platyhelminth parasites is now deposited in the Meguro Parasitological Museum (MPM), Tokyo (see Shimazu, 1987\*\*). I have just finished selecting from the collection the specimens of the parasite species (turbellarians, monogeneans, and digeneans) that were described in Dr. Ozaki's publications from 1923 to 1966 and giving the MPM Collec-

tion Numbers (MPM Coll. Nos.) to them.

This checklist is a revised version of my previous publication (Shimazu, 1987\*\*) and organized under six headings: Introduction, Methods, Host-Parasite List, References, Parasite-Host Index, and Japanese Host Name Index. The collection also contains a large number of specimens not included in Dr. Ozaki's publications, but they are not dealt with herein.

I thank Dr. Satoru Kamegai, Director of the MPM, for permitting me to examine Dr. Ozaki's specimens and Ms. Kaori Takada, Nagano Prefectural College, for cleaning the slides, many of which had been soiled by very dirty substances. Thanks are also due to Dr. Leo Margolis, Pacific Biological Station, Nanaimo, Canada, for making some valuable comments on the manuscript.

\*Nagano Prefectural College, 49-7 Miwa 8-chome, Nagano 380, Japan.

\*\*Shimazu, T. (1987): A checklist of platyhelminth parasites reported by Dr. Yoshimasa Ozaki, 1923-1966. *J. Nagano-ken Jun. Coll.*, No. 42, 17-36.

## Methods

In the Host-Parasite List, host species of the classes Bivalvia, Gastropoda, Crustacea, Holothuroidea, Osteichthyes, Amphibia, Reptilia, Aves, and Mammalia are listed in this order. They are preceded by host numbers and arranged in alphabetical order of their scientific or rarely English or Romanized Japanese names in each class. Romanized Japanese names of the classes and host species are given in brackets after the host scientific names. For each host species listed, its parasites are arranged in alphabetical order of their scientific names, each of which is accompanied by author(s) and date. The classes Turbellaria, Monogenea, and Digenea to which each parasite species belongs are indicated by "T," "M," and "D" placed before the parasite's name. For each parasite species listed, the following information is provided from each of the corresponding publications arranged chronologically: the year of publication; publication number (see the References) in brackets; page number(s); figure number(s), if present; table number(s), if present; location(s) within the host; developmental stage(s); main field(s) of study; and locality(ies). Further, enclosed in brackets after the information on locality(ies) are the MPM Coll. No(s). of the specimen(s) found in the collection; and the holotype depository, if known. When a parasite species is a new species proposed in the first identified publication, its scientific name is followed only by "n. sp." When the new species is the type species of a new genus created in the publication, its scientific name is followed only by "n. gen., n. sp." In the last brackets, a plus sign (+) indicates a new species whose holotype was deposited by the author(s) in the Zoological Institute, Science Faculty, Tokyo Imperial University (now the Department of Zoology, Faculty of Science, University of Tokyo). Thirty-eight out of the holotypes designated from 1924 to 1934 were deposited in the Zoological Institute, but all of them are missing at present. A "holotype" indicates that the holotype specimen

by original designation or by monotypy of the respective new species has been specified in the collection. A "no specimen" indicates that no specimen of the respective parasite species has been found in the collection.

In the References, publications are chronologically arranged by author(s), with their publication numbers before them. In the Parasite-Host Index, parasite species are listed in alphabetical order of their scientific names in each class. Figures located after them correspond to the host numbers given in the Host-Parasite List. In the Japanese Host Name Index, host species are listed in alphabetical order of their Romanized Japanese names in each class. Figures located after them correspond to the host numbers given in the Host-Parasite List.

Host, parasite, and locality names described in the original publications are cited in this checklist. Those that are regarded as obvious errors are followed by possible correct names in brackets. This checklist includes many matters that remain problematical, and these are followed by an interrogation mark (?) within or without brackets. My previous checklist has mistakes and errors, which have been corrected as far as possible in this checklist.

The Host-Parasite List shows that Dr. Ozaki and his coauthors established 86 new species (turbellarians, 2; monogeneans, 5; and digeneans, 79) and 1 new subspecies of monogenean. Their publications and specimens in the collection suggest that they designated holotypes and labelled the specimens as "type" for these new species and subspecies. It does not seem that they designated paratypes because no specimens labelled as "paratype" have been found in the collection. As mentioned already, since they had deposited 38 of the holotypes in the Zoological Institute, Science Faculty, Tokyo Imperial University, the collection should have included the remaining 49 holotypes. However, only 15 specimens in the collection have proved unquestionably to be labelled as "type." Specimens of many of the described parasite species no longer exist in the collection. Labels of the specimens listed in the

Host-Parasite List are incomplete. Letters written in ink on many of the labels have faded away. Moreover, some specimens lack any labels. Furthermore, the specimens listed would need closer reexamination, and nomenclatural problems of the new species and subspecies should be solved as soon as possible.

#### Host-Parasite List

##### BIVALVIA [nimaigai-rui]

- 1 *Cestrea denselamellosa* [itabogaki]
  - D *Bucephalus* cercaria: 1952 b [48], p. 69, occurrence, Hiroshima [30083?].
  - D *Bucephalus itabo* Ozaki, 1952: 1954 [50], pp. 45-46, no figure, location not given, cercaria, life cycle and taxonomy, Mukaishima (Hiroshima Pref.) [30083?].
- 2 *Cestrea gigas* [magaki]
  - D *Bucephalus itabo* n. sp.: 1952 b [48], p. 69, no figure, liver and gonad, sporocyst and cercaria, morphology and taxonomy, Hiroshima [30083?]. (The specific name and reference 50 suggest that the host is correctly *Cestrea denselamellosa*.)
- 3 *pictada martensi* [sic, correctly *Pinctada martenstii*] [akoyagai]
  - D *Bucephalus margaritae* n. sp.: 1934 [53], pp. 439-441, figs. 1-3, whole tissue, sporocyst and cercaria, morphology and taxonomy, Wagu and Goza (Mie Pref.) [30084-30087].

##### GASTROPODA [makigai-rui]

- 4 *Euhadra peliomphala* [misujimaimai]
  - D *Harmostomum horisawai* n. sp.: 1925 b [5], p. 1796, no figure, pericardial cavity, metacercaria, morphology, life cycle and taxonomy, Tokyo[?] [30123].
- 5 *Philomyces bilineatus* [namekuji]
  - D *Harmostomum horisawai* n. sp.: 1925 b [5], p. 1794, no figure, pericardial cavity, metacercaria, occurrence and life cycle, Tokyo[?] [no specimen].

##### CRUSTACEA [kōkaku-rui]

- 6 *Potamon dehaani* [sawagani]
  - D *Macrorchis spinulosus* Ando, 1919: 1966 a [56], pp. 102-106, fig. 1, tables 1-6, liver, heart, hemocoel and body muscles, metacercaria, prevalence and morphology, Rokuroshi (Iwakuni, Yamaguchi Pref.); 1966 b [57], pp. 110-112, figs. 1-2, 1 fig. (p. 111), metacercaria, morphology, Rokuroshi [30148].
  - D *Metacercaria shikokuensis* Ito, Nakase and Yokogawa, 1956: 1966 a [56], pp. 102-106, fig. 1, tables 1-6, liver, hemocoel and body muscles, metacercaria, prevalence and morphology, Rokuroshi [30149].
  - D *Paragonimus miyazakii* Kamo, Nishida, Hatsushika and Tomimura, 1961: 1966 a [56], pp. 102-106, figs. 1-2, tables 1-6, liver, heart, hemocoel and body muscles, metacercaria, prevalence and morphology, Rokuroshi [30150].

##### HOLOTHUROIDEA [namako-rui]

- 7 *Stichopus japonicus* [manamako]
  - T *Anoplodium mediale* n. sp.: 1932 c [20], pp. 81-84, figs. 1-2, pls. 1-2, body cavity, adult, morphology and taxonomy, Hiroshima [+, 30088].
  - T *Xenometra arbora* n. gen., n. sp.: 1932 c [20], pp. 85-87, fig. 3, pl. 3, intestine, adult, morphology and taxonomy, Hiroshima [+, 30089].

##### OSTEICHTHYES [kōkotsugyo-rui]

- 8 *Acanthogobius flavimanus* [mahaze]
  - D *Coitocoecum orthorchis* n. sp.: 1926 b [9], pp. 128-130, no figure, stomach and intestine, adult, morphology and taxonomy, Japan [+, no specimen]; 1929 a [13], as *Coitocaecum orthorchis*, pp. 82-84, fig. 4, stomach and intestine, adult, morphology and taxonomy, fish market in Takamatsu [no specimen].

- 9 *Acheilognathus lanceolatus lanceolatus* [yaritanago]  
D *Clinostomum complanatum* (Rudolphi, 1819) Braun, 1899: 1943 [40], pp. 13-17, figs. 2-3 and 5, pl. 1, body muscles, metacercaria, morphology and taxonomy, Saijo (Hiroshima Pref.) [30097].
- 10 *Amia lineata* [tenjikudai]  
D *Opegaster brevifistula* n. sp.: 1928 a [11], p. 20, fig. 11, intestine, adult, morphology and taxonomy, Takamatsu [+], no specimen].
- 11 *Anguilla japonica* [unagi]  
D *Azygia anguillae* n. sp.: 1924 b [3], pp. 426-430, fig. 2 (p. 429), figs. 1-3(p. 433), stomach, adult, morphology and taxonomy, near Tokyo [30210?].
- 12 *Beryx decadactylus* [nan'yōkinme]  
D *Bucephalopsis latus* n. sp.: 1928 b [12], pp. 54-55, fig. 25, intestine, adult, morphology and taxonomy, Tokyo [+], no specimen].
- 13 *Cantherines modestus* [umazurahagi]  
D *Leptrema* [sic, correctly *Lepotrema*] *clavatum* Ozaki, 1932: 1936 b [32], p. 515, intestine, occurrence, near Hiroshima [30030?].  
D *Leptocreadium skrjabini* n. gen., n. sp.: 1936 b [32], pp. 513-514 and 515-516, pl. 16 (figs. 1-2), intestine, adult, morphology and taxonomy, near Hiroshima [30031?]; 1937 c [36], pp. 449-450, figs. 1-2, as in [32].
- 14 *Chilomycterus affinis* [ishigakifugu]  
D *Heterolebes maculosus* Ozaki, 1935: 1937 a [34], pp. 131-159, figs. 3, 11 and 19(B), intestine, adult, morphology, Yaku Island (Kagoshima Pref.) [no specimen] and Itoman (Loochoo Islands, Okinawa Pref.) [no specimen]; 1937 b [35], pp. 167-212 and 230, figs. 29, 41, 48(5) and 61, continued from [34].  
D *Opistholebes cotoylophorus* Ozaki, 1935: 1937 a [34], pp. 131-159, figs. 2, 6, 8,
- 10 and 19(A)-20, pl. 2, figs. 4-5, intestine, adult, morphology, Yaku Island [30047?] and Itoman [no specimen]; 1937 b [35], pp. 167-212 and 226-227, figs. 32-34, 40, 42(3), 46 and 59, continued from [34].
- D *Opistholebes elongatus* n. sp.: 1937 a [34], pp. 131-159, fig. 7, intestine, adult, morphology and taxonomy, Yaku Island [30039?] and Itoman [no specimen]; 1937 b [35], pp. 228-229, figs. 42(1-2) and 60, continued from [34].
- 15 *Diacocetus peterseni* [hoshisemihōbō]  
D *Anisoporus cobraeformis* n. gen., n. sp.: 1928 a [11], pp. 21-22, fig. 12, intestine, adult, morphology and taxonomy, Takamatsu [+], no specimen].
- 16 *Diodon holacanthus* [harisenbon]  
D *Heterolebes maculosus* n. gen., n. sp.: 1935 c [29], pp. 245-246, fig. 2, intestine, adult, morphology and taxonomy, locality not given [30032?]; 1937 a [34], pp. 131-159, figs. 3, 11 and 19(B), intestine, adult, morphology and taxonomy, Yaku Island (Kagoshima Pref.) [30034?] and Loochoo Islands [30033?]; 1937 b [35], pp. 167-212 and 230, figs. 29, 41, 47, 49(5) and 61, continued from [34].  
D *Opistholebes cotoylophorus* n. sp.: 1935 c [29], pp. 244-245, fig. 1, intestine, adult, morphology and taxonomy, locality not given [30040?]; 1937 a [34], pp. 131-159, figs. 2, 6, 8, 10 and 19(A)-20, pl. 2, figs. 4-5, Yaku Island [30037, 30045-30047] and Loochoo Islands [30041-30044?]; 1937 b [35], pp. 167-212 and 226-227, figs. 32-34, 40, 42(3), 46 and 59, continued from [34].  
D *Opistholebes elongatus* n. sp.: 1937 a [34], pp. 131-159, fig. 7, intestine, adult, morphology and taxonomy, Yaku Island [30037-30038?] and

- Itoman (Loochoo Islands) [30035-30036?]; 1937 b [35], pp. 167-212 and 228-229, figs. 42(1-2) and 60, continued from [34].
- 17 *Ditrema temmincki* [umitanago]  
D *Coitocaecum latum* n. sp.: 1929 a [13], pp. 88-89, fig. 7, intestine, adult, morphology and taxonomy, Shimonoseki [+, 30051?].
- 18 *Gnathopogon mayedae* [moroko]  
D *chlonorchis* [sic, correctly *Clonor-chis*] *sinensis* (Cobbold, 1875) Looss, 1907: 1949 a [42], p. 71, location not given, metacercaria, occurrence, Nishiachi and Seo (Okayama Pref.) [no specimen].
- 19 *Goniistius zonatus* [takanohadai]  
D *Leptocreadium vitellorum* n. sp.: 1936 b [32], pp. 514 and 516-517, 1 fig. (p. 517), intestine, adult, morphology and taxonomy, Shimonoseki [no specimen]; 1937 c [36], pp. 451-452, fig. 3, as in [32].
- 20 *Holacanthus septentrionalis* [kinchakudai]  
D *Paragyliauchen chaetodonis* Yamaguti, 1934: 1937 a [34], pp. 131-159, fig. 5, rectum, adult, morphology, Shimonoseki [30048]; 1937 b [35], pp. 167-212 and 218-219, figs. 37 and 49(2), continued from [34].
- 21 *Inimicus japonicus* [oniokoze]  
D *Gotonius facilis* n. gen., n. sp.: 1924 a [2], pp. 180-183 and 190-199, figs. 1(3) and 2(1-4), pl. 4 (figs. 4-5 and 10), pyloric ceca and intestine, adult, morphology and taxonomy, fish market in Takamatsu [+, 30049]; 1928 b [12], pp. 41-42 and 45-48, figs. 10-19, as in [2].
- 22 *Latilus japonicus* [amadai]  
D *Trigonotrema alatum* n. gen., n. sp.: 1929 b [60], pp. 371-373, figs. 2-8, intestine, adult, morphology and taxonomy, Kagoshima [30052?].
- 23 *Leptocephalus myriaster* [maanago]  
D *Bucephalus itabo* Ozaki, 1952: 1954 [50], p. 46, intestine, adult, life cycle and taxonomy, experimental infection [no specimen].
- D *Dolichoenterum longissimum* n. gen., n. sp.: 1924 a [2], pp. 184-186 and 190-194, figs. 1(4) and 2(5-7), pl. 4 (figs. 6, 7 and 9), intestine, adult, morphology and taxonomy, locality not given [+, 30078?]; 1928 b [12], pp. 49 and 51-53, figs. 20-23, intestine, adult, morphology and taxonomy, Onomichi (Hiroshima Pref.) [no specimen], Shimonoseki [30078] and Takamatsu [no specimen].
- D *Opecoelus sphaericus* n. gen., n. sp.: 1925 c [6], pp. 51-52, pl. 7 (figs. 1-2), intestine, adult, morphology and taxonomy, Takamatsu [+, 30067?]; 1925 d [7], pp. 417-418 and 421-422, fig. 1, pl. 8 (figs. 1-2), as in [6]; 1928 a [11], pp. 7 and 9-12, figs. 1-5, intestine, adult, morphology and taxonomy, Onomichi [30068-30069?], Shimonoseki [30070-30071], Takamatsu [30067?] and Mitsugahama (Ehime Pref.) [30068-30069?].
- D *Prostorhynchus aculeatus* Odhner, 1905: 1928 b [12], p. 38, occurrence, Inland Sea of Japan [no specimen].
- D *Prostorhynchus crucibulum* (Rudolphi, 1819) Odhner, 1905: 1924 a [2], pp. 176-177 and 190-194, pl. 4 (fig. 1), location not given, adult, morphology, Itosaki [30072?] and Onomichi (Hiroshima Pref.) [30072?].
- D *Prostorhynchus squamatus* Odhner, 1905: 1924 a [2], pp. 177-178 and 190-194, fig. 1(1), pl. 4 (fig. 2), intestine, adult, morphology, locality not given [no specimen].
- D *Prostorhynchus uniporus* n. sp.: 1924 a [2], pp. 178-180 and 190-194, fig. 1(2), pl. 4 (figs. 3 and 8), intestine, adult, morphology and taxonomy,

- Itosaki [+, 30074] and Onomichi [no specimen]; 1928 b [12], pp. 36 and 38-39, figs. 1-5, pyloric ceca and intestine, adult, morphology and taxonomy, Onomichi [no specimen], Shimonoseki [30076] and Takamatsu [30075]; 1954 [50], p. 46, intestine, experimental infection, life cycle and taxonomy [no specimen].
- 24 *Leptocephalus* sp. [maanago?]
- D *Prosorhynchus crucibulum* (Rudolphi, 1819) Odhner, 1905: 1928 b [12], pp. 39 and 41, figs. 6-9, intestine, adult, morphology, Japan [30073?].
- 25 *Misgurnus anguillicaudatus* [dojō]
- D *Macrolecithus gotoi* n. gen., n. sp.: 1926 [62], pp. 225-227, fig. 1, 1 table (p. 226), intestine, adult, morphology and taxonomy, locality not given [+, 30009?].
- 26 *Mogurnda obscura* [donko]
- D *Asymphylodora macrostoma* n. sp.: 1925 a [4], pp. 104-106, fig. 4, cloaca, adult, morphology and taxonomy, near Saijo (Hiroshima Pref.) [30028?].
- D *Coitocoecum plagiorchis* n. sp.: 1926 b [9], pp. 125-128, no figure, stomach and intestine, adult, morphology and taxonomy, Japan [+, 30028?]; 1929 a [13], as *Coitocaecum plagiorchis*, pp. 77-78 and 80-82, figs. 1-3, stomach and intestine, adult, morphology and taxonomy, Saijo [30028?].
- D *Genarchopsis goppo* n. gen., n. sp.: 1925 a [4], pp. 101-103, figs. 1-3, intestine, adult, morphology and taxonomy, near Saijo [30028?]; 1929 a [13], p. 78, occurrence, Saijo.
- 27 *Monacanthus cirrhifer* [kawahagi]
- D *Hypocreadium symmetrorchis* n. gen., n. sp.: 1936 b [32], pp. 514-515 and 517-518, pl. 16, figs. 3-4, intestine, adult, morphology and taxonomy, Goza (Mie Pref.) [no specimen]; 1937 c [36], as *H. symmetrorchis*, p. 452, fig. 4, as in [32].
- D *Lepotrema clavatum* n. gen., n. sp.: 1932 b [19], pp. 44-45, figs. 1-3, intestine, adult, morphology and taxonomy, from Otaru (Hokkaido) southwards to Nagasaki [30029?].
- D *Plectognathotrema lobatum* n. sp.: 1937 b [35], pp. 209 and 234-236, figs. 49(7), 63 and 68, ovary, adult, morphology and taxonomy, Shimonoseki [30050].
- 28 *Moroco steindachneri* [aburahaya]
- D *Liolope copulans* Cohn, 1902: 1951 [54], pp. 113-118, figs. 1-4, tables 1-5, body muscles, metaceraria, morphology, Ooasa (Hiroshima Pref.) [no specimen].
- 29 *Opsariichthys uncirostris* [hasu]
- D *Allocreadium hasu* n. sp.: 1926 b [9], p. 125, no figure, intestine, adult, morphology and taxonomy, Japan [+, 30006?].
- 30 *Parapercis ommatura* [matōtoragisu]
- D *Opegaster ovatus* n. gen., n. sp.: 1928 a [11], pp. 17-18, fig. 9, intestine, adult, morphology and taxonomy, Takamatsu [+, no specimen].
- D *Opegaster rectus* n. sp.: 1928 a [11], p. 19, fig. 10, intestine, adult, morphology and taxonomy, Takamatsu [+, no specimen].
- 31 *Parapristipoma trilineatum* [isaki]
- D *Opecoelus lobatus* n. sp.: 1925 c [6], p. 52, no figure, intestine, adult, morphology and taxonomy, Choshi (Chiba Pref., not Ibaraki Pref.) [+, no specimen]; 1925 d [7], pp. 419 and 422, pl. 8, fig. 3, as in [6]; 1928 a [11], pp. 12-13, fig. 6, intestine, adult, morphology and taxonomy, Choshi [no specimen].
- 32 *Parasilurus asotus* [namazu]
- D *Bucephalopsis ovatus* n. sp.: 1928 b [12], pp. 56-58, fig. 27, intestine, adult, morphology and taxonomy, Korea [+, 30082].
- 33 *Pleuronichthys cornutus* [meitagarei]

- D *Bucephalus itabo* Ozaki, 1952 = *Prosorhynchus uniporus* Ozaki, 1924: 1954 [50], pp. 45-46, skin, metacercaria, morphology, life cycle and taxonomy, natural and experimental infections, near Onomichi (Hiroshima Pref.) [no specimen].
- 34 *Sarcocheilichthys variegatus* [higai]  
 D *Lebouria elongata* n. sp.: 1930 [61], p. 75, fig. 2, intestine, adult, morphology and taxonomy, Lake Biwa (Shiga Pref.) [30024?].  
 D *Tetracotyle biwaensis* n. sp.: 1930 [61], pp. 80-81, figs. 6-7, adipose tissue of mesenteries and liver, metacercaria, morphology and taxonomy, Lake Biwa [no specimen].
- 35 *Scomberomorus niphonius* [sawara]  
 D *Nannoenterum pentagonum* n. gen., n. sp.: 1924 a [2], pp. 187 and 190, fig. 1(5), intestine, adult, morphology and taxonomy, locality not given [+, 30062]; 1928 b [12], pp. 53-54, fig. 24, intestine, adult, morphology and taxonomy, Takamatsu, as in [2].
- 36 *Seriola aureovittata* [hiramasa]  
 D *Bucephalopsis elongatus* n. sp.: 1928 b [12], p. 56, fig. 26, intestine, adult, morphology and taxonomy, Takamatsu [+, 30090].
- 37 *Siganus fuscescens* [aigo]  
 D *Atractotrema fusum* n. gen., n. sp.: 1929 b [60], pp. 369-370, fig. 1, intestine, adult, morphology and taxonomy, Takamatsu [30056, holotype].  
 D *Coitocaecum diplobulbosum* n. sp.: 1929 a [13], p. 85, fig. 5, intestine, adult, morphology and taxonomy, Takamatsu [+, no specimen].
